

Teams Room Systems

After a prolonged period of remote working at Alzheimer's Research UK, we recommended the Yealink room system in preparation for their staff's return.

This is a wireless Teams telephony system that allows simple and inclusive multiparty collaboration.

It brings the functionality of Teams to a face to face meeting and is ideal for hybrid, office and remote working.

The installation comprised of:

- 8 x Yealink MVC 400 Microsoft Teams Room Systems
- 1 x Samsung 4K UHD Commercial 85" Display
- 5 x Samsung 4K UHD 55" LED Smart TV
